Bayonne, NJ | +1(980)-328-4746 | poojadevarapu@gmail.com | [GitHub](#) | [LinkedIn](#)

SUMMARY

- Experienced Data Engineer with 3+ years of expertise in designing scalable data pipelines, optimizing workflows, and enabling advanced analytics in dynamic, enterprise-grade environments.
- Proficient in modern SDLC methodologies, including Agile and Scrum, with hands-on experience in big data frameworks like Apache Spark, PySpark, Kafka, and orchestration tools such as Apache Airflow.
- Advanced programming skills in Python, SQL, and R, leveraging libraries like Pandas, NumPy, and Scikit-learn to build high-performance pipelines and machine-learning-enabled data models.
- Expertise in real-time and batch processing, utilizing ETL tools such as Apache NiFi, AWS Glue, dbt, and Kafka Connect for seamless data integration and transformation.
- Skilled in cloud platforms, including AWS (Redshift, Glue, EMR), Microsoft Azure (Data Factory, Synapse), and Google Cloud Platform (BigQuery), ensuring scalable, cost-effective solutions.
- Proficient in data visualization tools like Tableau and Power BI, creating interactive dashboards to provide impactful business intelligence.
- Strong database management expertise in both relational databases (PostgreSQL, MySQL, SQL Server) and NoSQL solutions (MongoDB, DynamoDB), optimizing data storage and query performance.

EXPERIENCE

HCL Tech, USA | Feb 2024 – Present

Data Engineer

- Designed and implemented scalable ETL pipelines using Apache NiFi, Talend, and SSIS, enabling seamless integration of large datasets from diverse sources and ensuring 99.9% real-time data availability for business analytics.
- Utilized Apache Spark and PySpark to optimize data processing workflows, achieving a 30% reduction in job execution time for batch processing of structured and semi-structured data.
- Developed machine-learning-enabled data models using Python and advanced libraries like Pandas, Scikit-learn, and TensorFlow, enabling predictive analytics for customer segmentation.
- Created interactive dashboards in Tableau, utilizing advanced visualization techniques to deliver actionable insights, driving 40% improvement in stakeholder decision-making efficiency.
- Designed and implemented microservices-based ETL workflows using Docker and orchestrated with Kubernetes for efficient data processing.
- Ensured high availability and performance of data storage solutions by managing and optimizing PostgreSQL and MySQL queries, achieving a 15% boost in query execution speed across multiple environments.
- Deployed and monitored cloud-based data solutions on AWS, leveraging services like Redshift, Glue, and EMR to deliver scalable and cost-effective data processing, reducing cloud costs by 20%.

Hexaware Technologies, India | Jan 2020 - Jul 2022

Data Engineer

- Engineered robust data pipelines using Apache Kafka, Apache Flink, and Airflow, enabling seamless real-time data streaming and batch processing across multiple business units, resulting in a 40% improvement in data processing efficiency.
- Designed and optimized data models and analytics workflows in Power BI, improving decision-making capabilities by delivering visually rich and intuitive dashboards, leading to a 30% increase in stakeholder engagement.
- Processed and wrangled massive datasets using Scala and SQL, enabling advanced reporting and insights generation for diverse business requirements.
- Orchestrated big data workflows in Hadoop (HDFS and MapReduce), ensuring seamless integration with cloud-based storage solutions in Azure and GCP, resulting in a 20% reduction in data processing time.
- Enhanced data quality and consistency through data cleaning and wrangling techniques, implementing automated validation checks to ensure accurate reporting and analysis.
- Integrated Dockerized data pipeline applications into CI/CD pipelines using Jenkins/GitHub Actions for automated testing and deployment.
- Built and managed databases in MongoDB, Oracle, and SQL Server, optimizing data storage, retrieval, and query performance.
- Used GitLab for version control and collaborative development, ensuring robust code management and review processes.

SKILLS

Methodologies: SDLC, Agile, Waterfall

Programming Language: Python, R, SQL, Scala

IDE's: PyCharm, Jupyter Notebook

Big Data Ecosystem: Apache Spark, PySpark, Hive, Hadoop (HDFS, MapReduce), Kafka, Sqoop, Airflow, Apache Flink

ETL Tools: SSIS, Apache NiFi, Apache Kafka, Talend, Apache Airflow, Informatica

Cloud Technologies: AWS, Azure, GCP, DataBricks

Reporting Tools: Tableau, Power BI, SSRS

Packages: NumPy, Pandas, Matplotlib, SciPy, Scikit-learn, Seaborn, TensorFlow

Databases: MySQL, MongoDB, SQL Server, PostgreSQL, Oracle

Containerization & Orchestration: Docker, Kubernetes

Version Control Tools: Git, GitHub, GitLab

Other Skills: Data Cleaning, Data Wrangling, Critical Thinking, Communication Skills, Presentation Skills, Problem-Solving, Data Management

Operating Systems: Windows, Linux, Mac

EDUCATION

MS in Computer Science in Data science | University of North Carolina at Charlotte, NC

Dec 2023

B.Tech in Computer Science | Vignan's Foundation for Science, Technology & Research, Guntur, Andhra Pradesh

Jun2022

CERTIFICATIONS

- AWS Certified Cloud Practitioner
- Azure Databricks Licensed Lake House Fundamentals
- Azure Databricks Attested Apache Associate Spark Developer
- Udemy Accredited in Snowflake Master Class
